

**CRITICAL: Don't plant the tree too deep.**

**Never cover the root flare with soil.**

\*\*\*\*\*

**REMEMBER THESE 6 KEY STEPS**

1. Dig a **WIDE & SHALLOW HOLE**  
*(1 foot deep; 4 feet wide)*
2. Set stakes **before** setting the tree.
3. **BE GENTLE** with the roots and trunk.
4. Set the tree **straight & NOT TOO DEEP!!**  
**Keep the root flare visible above soil.**
5. **ASK your LEAD PLANTER**  
**to CHECK & APPROVE**  
the depth & straightness of the tree  
**BEFORE YOU PUT DIRT BACK**  
into the hole
6. If **compost is at the site**, mix it into the soil  
before filling the hole

**CRITICAL: Don't plant the tree too deep.**

**Never cover the root flare with soil.**
